

Geological Association with Seismic Reflections

MODULE

About the Skill Module

The key to using or interpreting seismic data is to relate it to the geology and prospectivity. This skill module is designed to explain the basics of what is called the seismic process.

Target Audience

Geoscientists, engineers, team leaders, geoscience technicians, asset managers, and anyone involved in using seismic data that needs to understand and use this data at a basic level or to communicate with others that use it.

You Will Learn

Participants will learn how to:

- Describe the lithology and how it relates to the seismic image
- Relate the logs to the seismic data
- Identify the effect of pore filling material on velocity and density

Product Details

Categories: Upstream

Disciplines: Geophysics

Levels: Basic

Product Type: Individual Skill Module

Format: On-Demand

Duration: 2.5 hours (approx.)

\$250.00
