

# Petrophysical Data and Open Hole Logging Operations

#### MODULE

### About the Skill Module

This skill module is an introduction to a specialized area of E&P called Petrophysics. The field operations and technologies required to identify and quantify oil and gas resources are introduced. Topics include Well Logging, MWD/LWD, and an introduction to Petrophysics and petrophysical data acquisition. The material presented is at the awareness competency level.

# **Target Audience**

Geoscientists and engineers with less than twelve months experience using petrophysical data, Ideal for other technical staff and non-technical staff (e.g., management, drilling operations, technical support staff, finance, legal, IT, supply chain management, and others) at all experience levels wanting a basic background in the petrophysics discipline. This skill module lays the foundation for effective communications between the Subsurface Team and everyone else in the E&P Industry including Service Company and Government employees.

# You Will Learn

- · The concept, scope and basics of "Petrophysics"
- How Petrophysics integrates with the other subsurface specialties (Geology, Geophysics, Reservoir Engineering, Drilling Engineering)
- · The importance of sufficient petrophysical data to achieve correct reservoir modeling
- · The emphasis is on borehole environment and openhole logging
- Petrophysical data acquisition
- Openhole well logging
- MWD/LWD

# **Product Details**

Categories: <u>Upstream</u> Disciplines: <u>Petrophysics</u> Levels: <u>Basic</u> Product Type: Individual Skill Module Format: On-Demand Petrophysical Data and Open Hole Logging Operations

Duration: 3.5 hours (approx.)

\$395.00
