

Reservoir Management Fundamentals

MODULE

About the Skill Module

This skill module will deal with more advanced treatment of reservoir management principles. We will look more thoroughly at special reservoir situations. We will also deal specifically with your own reservoir management asset issues in this skill module.

Target Audience

Engineers or geoscientists who will occupy the position of reservoir engineer, and any other technically trained individual who desires a more in-depth foundation in reservoir engineering.

You Will Learn

Participants will learn how to:

- Manage reservoir management uncertainties throughout phases of field maturity
- Identify the geologic and reservoir parameters that make an opportunity and then the capture techniques to the particularities of that opportunity
- Conduct analysis to determine the most appropriate injectant including EOR techniques (if any) for a particular reservoir situation
- Apply the appropriate well architecture(s) or combination of well architectures to match the combined geology and reservoir drive mechanism
- Adjust and adapt the reservoir management plan for each new phase of field life

Product Details

Categories: Upstream

Disciplines: Reservoir Engineering

Levels: Foundation

Product Type: Individual Skill Module

Format: On-Demand

Duration: 8 hours (approx.)

\$795.00
